Dear Sir,
dear Madam,

enclosed please find our advertisement concerning an internship in our company that should comply with the criteria set up for Erasmus-internships (Lifelong Learning Programme).

Please forward our internship-offer to those Universities and Schools that come into question.

Our startup-team is composed of 5 people with long professional experience in the fields of IT-consultancy, sales and marketing, software development and law. About one year ago we had our first meeting exchanging our ideas on how to open up all the possibilities of the Internet to Small and Medium Businesses. Since then we work on an innovative set of IT-based service tools that is in the final state of development and be launched in early summer 2010. For the consumer-testing phase in spring we need a skilled intern to support us on the technical side.

Since we are a young company, founded in June 2009, and still in the pre-launch of our product, we could not grant more than 150 € monthly. But what we can guarantee is much input, excellent instruction and supervision and real startup atmosphere in a nice multiprofessional and multilingual team.

Please inform me about the forwarding of our advertisement and contact me on any question by Email or telephone, including my mobile (0176 78 50 1965).

With kind regards

Marion Weimer-Hablitzel
